I have 3 buttons on the first form and I am trying to get the value of the button with the highest number. I am using the following code but it keeps getting a null reference exception. private void Form1_Load(object sender, EventArgs e) { List list_1 = new List(); list_1.Add(5); list_1.Add(9); list_1.Add(23); list_1.Add(34); int highestValue = list_1.Max(x => x); //use highestValue for something } A: If you expect the highest value to be the one in the first item, use an array for an easier approach. int[] numbers = new int[3]; numbers[0] = 5; numbers[1] = 9; numbers[2] = 23; int highestValue = numbers.Max(); The mRNA of the rat beta 1-adrenergic receptor is translated in reticulocyte lysates and in a reticulocyte cell-free translation system. In order to obtain
